DETAILED ACTION

Drawings

The drawings are objected to because in Figure 1b element 6 has no lead line. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claim 7 is objected to because of the following informalities: In line 2, a word is missing after "compressible". Appropriate correction is required.

Art Unit: 3751

Claim 8 is objected to because of the following informalities: In line 5, apparently "ge" should be - - be - -. Appropriate correction is required.

Claim Rejections - 35 USC § 112

Claims 19 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 19 recites the limitation "the liquid supply reservoir" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Application/Control Number: 10/601,326

Art Unit: 3751

Claims 1-4, 7, 9-16 and 22-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Haar et al.

In regard to claim 1, 10 and 11, the Haar et al. reference discloses an "injection device" (Fig. 4) comprising a "container" 46, a re-usable "pressure generating mechanism" (41 and 48) and a "primary source" 17 of potential energy, as claimed.

In regard to claims 2-4, the substance is an elastomeric silicone gel having greater compressibility than water.

In regard to claim 7, see piston 38 in Figs. 4 and 5.

In regard to claim 9, see "ampoule" 14.

In regard to claim 12, see "cap" 44.

In regard to claims 13 and 14, see "plug" 41

In regard to claim 15, see "flexible wall" 13.

In regard to claim 16, see "plug" 22.

In regard to claims 22 and 23, see "spring" 48.

In regard to claim 24, see col. 4, lines 65 – col. 5 lines 42.

Allowable Subject Matter

Claims 5, 6, 8, 17, 18, 21 and 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 19 and 20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Art Unit: 3751

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Menne et al. reference pertains to an injection device having a magnetic drive.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy L Maust whose telephone number is (703) 308-3390. The examiner can normally be reached on Tue. - Fri. 6:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Huson can be reached on (703) 308-2580. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
